Paint Division Plans Expansion -- New Paint Brochure -- Launch of G-MAD Tooling Project -- Global Supports Chatham-Kent Health Alliance

### PAINT AND ASSEMBLY DIVISION TO EXPAND IN 2007

Global Vehicle Systems Inc., is extremely proud to announce a significant expansion to its **Paint and Assembly Division**. The expansion will grow this facility from 8,000 to 18,000 sq. ft. and will allow Global to double its capacity in order to better meet the requirements of its upcoming secured paint contracts. This growth will also enable Global to continue to offer prototype and emergency production paint support without disruption to its production commitments. Construction will begin by November 1, 2006 and is expected to be completed by May 2007.

The Paint and Assembly Division is a full service, Class "A" production paint facility, specializing in low, and mid volume, production of large and/or complex parts. This Division supplies its services to Tier 1 and 2 Suppliers to the automotive, heavy truck and recreational vehicle industries.

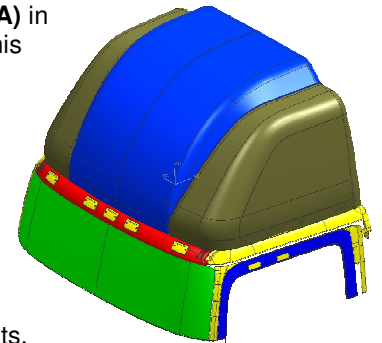

Global Vehicle Systems Inc., is also pleased to announce the release of its latest **Paint and Assembly Division brochure** that outlines this division's range of capabilities, provides updated facility details, and identifies the many unique and efficient services it offers. To receive a copy of this brochure, either by mail or electronically, please call Global today at 519-682-0707 or via email at [info@globalvehicle.ca](mailto:info@globalvehicle.ca).

*In the near future Global will be launching a new Corporate brochure and an updated web site to provide comprehensive and up-to-date information of our various operations.*

### G-MAD™ TOOLING LAUNCH

After several months of product development refinements Global is pleased to announce that it has launched a tooling project in support of its modular G-MAD™ Truck wind deflector program. Both the tooling and injection molding are being sourced locally. Global has secured an exclusive purchase commitment from **Hino Motors Canada, Ltd.** and **HINO Trucks (in the USA)** in support of this roll-out. This project represents further diversification of Global's business and will provide the heavy truck industry with a superior product choice that is manufactured to demanding specifications and provides numerous operating and cost benefits.

### GLOBAL SUPPORTS THE FOUNDATION OF CHATHAM-KENT HEALTH ALLIANCE "EVERY LIFE COUNTS" CAMPAIGN

As a responsible member of the regional business community, Global is concerned with the fact that the Chatham-Kent area is a designated **under-served community** for medical care. The **"Every Life Counts"** campaign is dedicated to attracting and retaining 19 new family doctors and 9 physicians to the area in order to meet current and near future needs. Global has pledged its support through a three (3) year financial commitment to the campaign and plans to work closely with organizers to assist in making this goal a reality. With many of our employees

working and living in the area it is vital that we do what we can to ensure that Global staff and our surrounding community members have access to reliable medical care.

With Global's help and other like minded organizations, perhaps this need can be satisfied. For more information on this campaign visit <http://www.foundationckha.com/everylifecounts/everylifecounts.html>
